

CAPABILITY STATEMENT

SUBTERA
subsurface locating

Subtera has been providing subsurface utility locating services in Western Australia for 20 years. A dependable reputation means they work with Australia's largest Environmental, Construction and Civil Engineering companies as well as Federal, State and Local Government clients, in the metro area and remote locations.

HOW CAN WE HELP?

Delivering 'peace of mind' through:

- 3D mapping of the subsurface infrastructure for design
- Subsurface Utility damage avoidance for Environmental Drilling/CPTs
- Site investigations for new construction projects
- Potholing and Markers for damage avoidance
- ATCO High Pressure Gas supervision

WHY CHOOSE US?

Quite simply, it's having a technician on the ground with the industry experience to handle high risk situations that matters most. That's why we strive to keep our crew at Subtera for the long term.

In this business it's the experience, culture, consistent procedures and level of training of the field team that most clearly separates a company from the crowd. In working with Subtera you will observe levels of efficiency, responsiveness and reliability which are not commonly found in our industry.

Our cloud based scheduling system enables our teams to have all the plans required for the job on site. All the records pertaining to your job are archived and are always on hand for immediate retrieval. The team will turn up when they say they are going to with the latest technology and information they need to get the job completed on time and within budget.

"We run a strict dig permit system at Coogee Chemicals, we don't have to reinvent the wheel every time a locating tech from Subtera is booked in. They know our system and what documentation is required."

John Reid, Coogee Chemicals

"For \$1 we spend with Subtera at the design stage of a project we expect to save \$4 on the overall project, its just makes good business sense, AS 5488 is the way to go for future projects."

Paul Blignaut, AECOM

LEGISLATION EXPERTISE

Partner with a company that knows the rules and legislation. Our documentation specifies every known utility in your work zone so that all asset owners infrastructure has been taken into account and located.

Not only are we protecting the client from damages and delays but also protecting the assets owners valuable infrastructure.

INSURED READY

When you partner with Subtera feel safe in the knowledge that our Workers Compensation/Professional Indemnity/Public Liability/Vehicle and Equipment insurances are all valid and up to date and in line with industry expectations. We'll forward all the relevant certificates through when requested.

HEALTH, SAFETY AND THE ENVIRONMENTALLY ASSURED

Our working environment is harsh and unforgiving and demands a world class HSSE system. It is an ever evolving system with yearly auditing. We strive for Goal Zero - Safety Incidents with our team, the public, infrastructure and the environment. Our Prestart application makes it easy for our staff to log Safety concerns which is monitored in real time by our operations staff.

WHAT DO WE DO

Rather than focus on our specific services and features it is best to consider Subtera as a company that provides 'peace of mind'. Whether you are not 100% confident of where subsurface utilities are located and need to fulfill insurance and/or OHS obligations, you can rely on Subtera to provide you with accurate and timely location information before commencing any excavations.

“When we get called in for burst water main at a defence base we need to act quickly, we call Subtera because of their availability, knowledge of the defence infrastructure and have all the documentation to get the dig permit over the line”

Tom Flower, Ace Plus

GENERAL LOCATING AND CONCRETE SCANNING

Contact us now to schedule one of our highly trained technicians with years of experience to locate the subsurface utilities so you can move forward with your project with peace of mind.

DAMAGE PREVENTION

Imagine letting your contractors get to work knowing the utilities are located and marked with PVC markers. Have piece of mind knowing your actions will save costs in damages and injuries.

SURVEY PLUS - AS5488

Dealing with subsurface utilities on large projects can be daunting and the lack of knowledge will lead to planning delays, redesigns, damages and outages. We see this everyday and the costs can be immense.

Subtera will provide your project with data in the format you choose with attributes so you can integrate the data into your GIS and create 3D models.
